About Me

Hello! My name is Kamruzaman Shojib and I enjoy creating things that live on the internet. My interest in web development started back in 2019 from the moment I produced "Hello World" on the console of my first application. I knew I was hooked into the world of software development. But software development has never been "just a job" for me, it's offered an engaging challenge to continually learn and improve.

My skills in creating high-quality software . What started a simple "Hello World" has become a full-fledged passion that only gets more exciting as the years go by.

Below you'll find projects I've completed that showcase my skills and general background in developing software.

Experience

Smart-Brain (Facerecognition)- [See-here-live](#)

A Face recognition application that detects faces in a photo which build using React, Node.js, and Postgresql, and API used Clarifai.

RoboFriends- [See-here-live](#)

I built this app while learning React you can find several robots and you can search top.

Clock UI- [See-here-live](#)

This is a clock which you can switch between light and dark clock.
